'21ST CENTURY LITERACY'

“The current and future health of America’s 21st Century Economy depends directly on how broadly and deeply Americans reach a new level of literacy—‘21st Century Literacy’—that includes strong academic skills, thinking, reasoning, teamwork skills, and proficiency in using technology.”

-21st Century Workforce Commission National Alliance of Business

A VISION...

FRAMEWORK FOR 21ST CENTURY LEARNING

The Framework for 21st Century Learning stated, “We believe schools must move beyond a focus on basic competency in core subjects to promoting understanding of academic content at much higher levels by weaving 21st century interdisciplinary themes into core subjects” (2007).

21st century skills bridge the knowledge, skills, and dispositions of students from the core academic areas to real life application.

21ST CENTURY SKILLS K-12

Twenty-first century skills will be integrated into all the content areas to the degree possible and some areas will be stand alone as separate units of instruction.
